INTRODUCTION: INSPIRING A NEW VISION

1.0 A Snapshot of ‘Population/Public Health’ through the Ages

- 1.1 Defining and contextualizing ‘public health’ practice**
 - 1.2 The new public health**
 - 1.3 Historical dimensions of public health: a synopsis**
 - Early medicine to 1700s
 - 1800s to present-day medicine
 - 1.4 The Welch-Rose Report (1915)**
 - 1.5 Milestones in the 20th / early 21st centuries: bumpy roads ahead?**
- References**

2.0 Contemporary Challenges in Public Health

- 2.1 Children’s lives ‘at a glance’: spotlight on six nations**
 - 2.2 Global public health: reflections on the ‘big’ picture**
 - 2.3 Population growth: impact of large-scale urbanization**
 - 2.4 Our fragile ecosystems: ensuring planetary health and well-being**
 - 2.5 Problems of ‘modernity’: genetic incongruence?**
 - 2.6 Social intolerances and challenging social norms**
- References**

3.0 Public Health: The Impending Financial Crisis

- 3.1 Affordability of an ageing population: should we be worried?**
 - 3.2 Curative vs preventive health care: re-balancing the funding equation**
- References**

4.0 World Health Reforms (UN, WHO, The World Bank) in the early 21st Century

- 4.1 Progress on the UN millennium development goals
and post-2015 Sustainable Development Goals: ‘back to the future’?**
 - 4.2 Universal health coverage: ‘right vs. reality’**
 - 4.3 Global strategy on public health, innovation and intellectual
property: ‘grappling’ with principles and practice**
 - 4.4 The World Bank: historical perspectives and revitalizing for the 21st century**
- References**

5.0 Contemporary Approaches to Public Health Policy and Practice

- 5.1 From horizontal policies to shared societal goals**
 - 5.2 Pervasive influence of ‘health in all policies’ (HiAP)**
 - 5.3 Case examples of preventive strategies**
 - 5.4 Reflections on current interventions**
 - 5.5 Bridging the ‘ingenuity gap’**
- References**

6.0 Community-Based Healthcare and Evolving Public Health ‘Fifth’ Wave Interventions

- 6.1 Professor Carl E. Taylor: pioneer in global health
 - 6.2 Origins of community-based primary care and public health
 - 6.3 The Alma-Ata declaration in the 21st century
 - 6.4 ‘Restoring health to health reform’
 - 6.5 Integrated service delivery: the ‘missing link’?
 - 6.6 Case examples: ‘prevention over cure’ in developing and developed nations
 - 6.7 Transitioning from a ‘sickness to a ‘well-being’ culture
 - 6.8 The essence and dimensions of an integrative and ecological public health framework
 - 6.9 Applying ‘fifth wave’ thinking to complex public health issues
 - 6.10 Advancing social accountability and human rights at national and community levels - Dr. Gerald Paccione: physician ‘extraordinaire’
- References

7.0 Towards a New Worldview

- 7.1 Rationales for fundamental global paradigm shifts
 - 7.2 The One Health movement
 - 7.3 Time scaling evolution and re-thinking public health interventions
 - 7.4 Public health as ‘a force for social change’: South America, India and South Africa
 - 7.5 Leading change in a new era: transforming mindsets and ‘building the new’ through One Health research, education, policy and practice
- References

8.0 Strengthening Public Health Capacity: ‘Working Differently Means Learning Differently’

- 8.1 Disease prevention and health promotion: a continuing ‘crisis of legitimacy’?
 - 8.2 Towards a comprehensive public health approach
 - 8.3 Public health practitioners and contemporary global public health competence frameworks
 - 8.4 Competency analyses exemplars: comparisons across seven nations/regions
 - 8.5 Public health: an expert occupation, a profession or both?
 - 8.6 *The Lancet* commission findings: systemic failures in global health education and training, reforms and enabling actions
 - 8.7 Applying *The Lancet* commission vision of ‘health professionals for a new century’ and curriculum benchmarks to the ‘master of public health’ (MPH) degree
 - 8.8 Emerging innovative health education program models
 - 8.9 Public health curriculum re-design: integrating learning, research
 - 8.10 Global health workforce crisis and WHO guidelines for scaling up education and training: informing dialogue and enabling action
- References

9.0 Global Health Professionals’ Education & Training and Future Directions

- 9.1 ‘Scaling up, saving lives’ revisited
 - 9.2 ‘A universal truth: no health without a workforce’
 - 9.3 Adapting health education & training to community needs
 - 9.4 Reflections on the education and training of health professionals: China, India and South Africa
 - 9.5 Future directions in health professionals’ education and training
 - 9.6 Cuba’s health system and Latin-American (ELAM) medical school: Dr. Brea Bondi-Boyd - affirming social accountability in health policy and practice
- References

10.0 Epilogue: 'Global Health, Governance and Education'

Table of Contents

Background Information and Acknowledgements

Abbreviations

10.1 Introduction

10.2 Epilogue rationales and aims

10.3 Global governance and structural challenges

10.4 Decision-making in public health: coordination and impact

10.5 Strengthening the role of non-governmental organizations (NGOs)
