

CAB International (CABI) Supports and Endorses One Health

April 19, 2012:

"**CABI** <http://www.cabi.org> is a not-for-profit international organization that improves people's lives by providing information and applying scientific expertise to solve problems in human health, veterinary medicine, agriculture and the environment.

Our information resources are used in medical and veterinary medical research and education throughout the world. We publish widely in the fields of public health, veterinary medicine, and the environment, and embraced the concept of 'One Health' as early as the 1930's with the publication of journals such as 'Review of Medical and Veterinary Entomology' and Review of Medical and Veterinary Mycology.

We entirely support the aims of the One Health initiative to enhance interdisciplinary collaboration between human health, veterinary medical, and environmental professionals."

Robert Taylor, BSc

Head Veterinary Market Development
CABI Head Office
